

## We Guarantee Every Video Book

As the leading Video Book Manufacturers we created an unmatched quality control process. Third party, 600%, overseas quality control, on every video book! This means there are 6 stations to building a video book. At every station we inspect each component for quality and craftsmanship, before it is aloud to move onto the next step. This ensures when the order arrives to our LA or NJ facility, every video book has gone through an incredible quality control process.

Even though our quality control (QC) overseas is incomparable we again QC in the states 100%! When the video books arrive we take each video book out of the bubble bag, open it up, turn it on, check for battery life, sound quality and video quality. If the battery has a low charge we charge it. Our QC is done on every single video book. No matter the size of the order.

### Video Book Manufacturers

#### Video Book Manufacturers

- Every part is brand new. Nothing is refurbished or used. This is extremely important with this category of product. It is imperative that all parts of this product are brand new, and grade A. Any refurbished parts will greatly increase the chance of this failing in your customers hands.
- If your video book has a diecut section where you would like to insert a sample product, gift, pen, keychain, we can insert it at no charge! This also includes inserting a PI or printed material inside a pocket that is inside the video book. If you choose a product to be inserted, you can choose from our extensive stock of promotional items!
- Our production can reach between 7,000 to 8,000 units daily.
- Over 200,000 square feet dedicated to our Video line
- Over 50,000 screens in stock daily
- Static free floors throughout the
